DETAILED ACTION

1. The allowance of claims 10, 43-47, 69-77, 79, 87-119, 123-128, 132-138, 142-144 and 149-158 is hereby withdrawn.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 10, 43-47, 69-77, 79, 87-119 and 150-158 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6-18 of U.S. Patent No. 6,883,011. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are merely a broaden version of the patented claims..

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Art Unit: 2193

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 123-128, 132-138, 142-144 and 149 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to an abstract idea which fails to be limited to a practical application in the technological arts. The claims fail to produce a concrete, tangible and useful result. Contrary to the preambles of the independent claims the body of the claims is not directed to the actual design of a circuit. In view of the paragraph spanning pages 12-13 of the specification claims 132, 142 and 149 are not limited to embodiments which would enable any functionality to occur. Claim 136 is not limited to embodiments which include the hardware necessary to realize any functionality, i.e. it may read on software per se.

Allowable Subject Matter

5. Claims 11-42, 129-131, 139-141 and 145-148 are allowed.
